

SEPTEMBER FLEET NEWS

Update

Runout sales of the iconic Mitsubishi **Outlander** are flying! We at Andrew Simms have secured the last of the 2.4 LS Outlander (as advertised) and stocks are now running low on the remaining models. Watch out for more offers on remaining models.

NEW MODEL **OUTLANDER** is likely to be on our shores end October / early November. The internet is abound with artist renditions & spyshots of the new front end treatment in particular, some of which are shown here...

Mitsubishi launches production of the iMiEV in Japan

Mitsubishi has launched series production of its iMiEV electric car at its Okayama, Japan factory. That makes the tri-diamond brand the first major automaker to kick off full-scale production of a new Electric Vehicle, though it will be followed by many automakers over the next few years. Mitsubishi plans to build about 2,000 units through the remainder of this fiscal year and then crank that up to 5,000 next year. The first cars are going to corporate fleet customers [in Japan] but retail sales are expected to start later in the year.

The iMiEV has a range of about 100 miles [about 160kms] from its lithium ion battery pack. The batteries are a result of a joint venture between Mitsubishi and Century Yuasa

Edited excerpt of report from www.autoblog.com

i MiEV

Mitsubishi innovative Electric Vehicle

From the 'we can neither confirm nor deny' file

Other news from the net recently has seen images from further afield of a facelifted Mitsubishi Triton, also sporting new front end treatment. And did someone say they saw a longer wellside....?

DON'T GET CAUGHT!

From November 1, handheld mobile phone use in cars will be against the law. Our solution is the Parrott CK3100 Bluetooth system. Easy Phone Sync, Address Book and Visual Display make the CK3100 great value for money at \$595.00 incl GST installed.
